INNOVACIÓN PARA LA EXCELENCIA

Inspected team: Team 1 (Juniors programmers)

Leader of inspected team: Camila Bohorquez

Project Name: SAMC

Inspector: Team 2 (Nightmare Squad)

Inspector leader: Lucas Góngora

Evidence

- **Presentation Letter:**

- Only photographs were taken, accompanied by descriptions. There was no signed letter from the customer.
- No audio or video evidence was provided.

- **Requirements:**

- Some requirements are not specific enough. All requirements should be consolidated into one document, rather than being split (following IEEE format).

- **Class Diagram:**

- The "Chef" actor is missing from the class diagram.
- The "Admin Control" class appears as an orphan class, with no clear connections.
- The "Content" class contains an attribute named "name_String" in snake_case, which should be adjusted to camelCase for consistency.

- **Code:**

- The "Waiter" class is not represented in the code.
- The "Bill" class correctly models all the methods defined in the UML.
- The "Sales Note" class is poorly modeled and needs revision.
- The orders attribute is not included in the model.
- The "Method of Payment" class is missing an attribute.

- **Clean Code/ Code execution:**

- The "Order" class contains two comments on lines 116 and 117, which require clarification or revision for clarity.
- The Manage File Csv function is initialized but not used anywhere in the code.
- The "Admin Menu" is not intuitive and lacks proper explanations.
- If an incorrect ID is entered, the program does not allow the user to continue or correct the error.
- The "Method of Payment" option is not accessible from the menu.
- The "Sales Note" or "Bill" options are not available in the menu.
